

Enhanced Urban transport in the University district

Pubblicato: Venerdì 9 Novembre 2018

Reinforced public transports in the Bizzozzero University district. From November 5, 2018

Autolinee varesine introduced, on an experimental basis, **three extra services of the C route, dedicated to the University of Insubria**. The “Uninsubria services” are operated in the **morning rush hour** with the following times: 8:16, 8:36 and 8:50. We are dealing with direct routes without intermediate stops, which start from **Corso Moro and via Morosini/libreria mondadori and arrive directly to the stop in via Monte Generoso**, with the exception of the internal detour to Bustecche/largo Deledda.

“Such bus routes allow to shorten the travel time and increase the frequency of the line in a time of great influx to the Campus of Bizzozzero of the University of Insubria” explains Professor **Elena Maggi**, mobility manager of the University. “This service, if successful, will be guaranteed on a permanent basis. We are also trying to **strengthen the service in the time bands 9-10 and 16-18 both on line C and on line E** and, on the latter point, we found a potential opening by the City of Varese and the Local Public Transport Agency of the area Como-Lecco-Varese, to which we proposed possible solutions that are being considered, “concludes the professor.
